
CONSTRUCTION MATERIALS TESTER – COLORADO

As a materials testing technician, you will support infrastructure projects across Colorado. This position will primarily support our construction services team in Denver Metro area with possible work in Colorado Springs or Grand Junction.

Working with other members of the team, you will prepare soil, concrete, and asphalt samples from various sources and follow standard sampling procedures for specific testing to determine the suitability of the materials for the intended use. You will assist professional engineers or professional geologist in the practical application of engineering or scientific processes and techniques related to civil engineering. You will review the work of contractors, inspect and document work on construction projects.

The ideal candidate will possess the following:**Senior Lab or Field Technician:**

- A comprehensive understanding of the technical aspects of construction materials testing
- High school graduation/GED plus 5-6 years of experience in materials testing, or 10 years of complex construction experience or US military construction training in lieu of a degree
- Certifications such as NICET, Labcat, ACI, etc.
- Excellent oral and written communication, team-oriented work practices, self-motivated, with strong technical problem-solving skills

Field/Lab Technician:

- High school/GED and 1-4 years of experience or US military training
- Certifications such as NICET, Labcat, ACI, etc.

Education/Training: At Yeh, we support each other at every level, including mentoring, continuing education pursuing professional development, and online courses.

Diversity: As an MBE firm, diversity is in our DNA.

Benefits: Paid holidays, health insurance, dental insurance, vision insurance, 401K, life insurance

Yeh is an Equal Opportunity Employer - M/F/Veteran/Disability.
