Staff Geotechnical Engineer Ventura, California

Immediate openings for Staff Engineer in Ventura, California

The primary duty will be to perform investigations and evaluations to develop design recommendations and assist in the preparation of reports, plans and specifications. More specific duties include executing subsurface investigation and laboratory testing programs, shallow and deep foundation analyses, slope stability analysis, subgrade evaluations, soil and rock cut slope designs, preparation of technical reports, proposals, and cost estimates under the supervision of a senior engineering project manager. The ideal candidate should be capable of working relatively independently on smaller tasks and assist senior professional and team on larger tasks. The position includes a mix of field and office duties with regional travel to the surrounding Counties.

Requirements:

- Bachelor's Degree in Civil Engineering or related engineering degree required, Master's Degree preferred.
- Engineer-in-training certificate with a clear track to obtaining professional engineering licensure is preferred.
- Entry-level candidates or those with up to 2 years of related geotechnical field and design experience.
- Good verbal and written communications skills required.
- Experience with MS Office Suite, MathCAD, Slide and/or SLOPEW, LPILE, and other technical programs preferred.

***BENEFITS INCLUDE: MEDICAL, DENTAL,
VISION, 401K, HEALTH SAVINGS ACCOUNT,
PAID LEAVE, HOLIDAYS AND MORE!***
